- Flexibility

Education

Present

MEAN Stack Developer trainee

Prototype (Packapeer Academy Pvt. Ltd.)

2021

Bachelor of Technology

APJ Abdul Kalam Technological University

CGPA: 7.62

Mohammed Mishal

MEAN STACK DEVELOPER

"Highly motivated and hard-working individual with a passion for software development. I have **completed** my **training as a software developer** and have been **working** in this field for the **past year**. During this time, I have honed my skills and have been able to **independently develop two applications**. My technical skills include **Angular, Node.js, MongoDB**. I am open to new challenges and opportunities and am eager to continue growing as a software developer. I am confident that my skills and experience make me an ideal candidate for any software development role."

Projects

Ecommerce Application (Furniture Store)

Oct-Nov 2022

<https://hourglassindia.store/>

<https://github.com/mishalBasheer/Hourglass>

- Cart management:** Add products to cart and wish list, apply discount coupons, and check out with online payment or cash on delivery.
- Order management:** Order products, cancel orders, and track order status.
- Product filtering:** Filter products by price range, categories, and brands.
- User authentication:** Authenticate users via OTP verification, and contact us form for enquiries/feedback.
- Admin management:** Manage banners on user landing page, categories, products, coupons, users, and view/save sales report.

★ Technologies Used:-

- Node js
- Express js
- EJS
- MongoDB
- JQuery
- AJAX
- Bootstrap
- Twilio
- Razorpay
- AWS EC2

Deployed in AWS EC2 instance with Nginx

Project Management Application (SPA)

Jan-2022 - Present

<https://github.com/mishalBasheer/provio-app>

- Built a full-stack project management application using Angular, Express.js, and MongoDB. Implemented authentication, role-based access control, task management, and communication features.
- Developed server-side features using Express.js and stored data in MongoDB.
- Improved skills in front-end development with Angular, server-side development with Express.js, and database management with MongoDB.

★ Technologies Used:-

- Angular 14
- NGRX
- Express js
- Socket.IO
- MongoDB
- JWT
- Role based Authorization
- Tailwind

Mini Projects

Task tracker Application (Angular 13, Node.js, MongoDB, Express.js)

[Git Link](#)

Simple application built on Angular to create or assign daily tasks.

Netflix Clone (Angular 13, JSON Server)

[Git Link](#)

Responsive Netflix clone application with Angular 14 integrating TMDB API

Posts and Counter App (Angular 14, NGRX, Node.js, MongoDB)

Basic application for understanding of NGRX state management and CRUD operations
